

Dear Sir/Madam,

I am writing to recommend Maya Belemezova-Zaharieva. She graduated a Codix sponsored 6 months training at Code Academy, was selected amongst the best and was offered employment with us. Unfortunately, due to external circumstances outside our control, we could not keep her as part of the team.

As an employee, Maya was always diligent and punctual. Whatever she lacked as development experience, she compensated with her wonderful work attitude and eagerness to help the team. During her time in the Java Backend team (3.5 months), she managed to complete the onboarding process and to take part in some complicated development.

Maya is a easy to work with, always ready to do some extra work for the team, with great work attitude and I wouldn't hesitate to hire her again.

Should you have any further questions, feel free to reach me at imarinov@codix.eu or +359885892779

Best Regards,
Iskren Marinov
